ES/EHS PETITION 2008

Completed forms to be sent to: ES/EHS Petition, PO Box 49747, London N20 0XR, UK by 1st November 2008.

Increasing numbers of people in the UK are suffering severe physiological reactions to pulsed microwave technologies such as mobile telephony, wireless computing and TETRA. We the undersigned call on the Prime Minister to:

- Recognise electrosensitivity (ES)/electro hypersensitivity (EHS) as a disability in the UK, in the same way as it is recognised in Canada and Sweden
- Respect the human rights of people with ES/EHS by providing "safe zones" free of pulsed microwave radiation; advising medical staff and others of the known and documented effects of this technology; or replacing pulsed microwave radiation with a safer technology.
- Fund urgent, well-designed research into this condition that is independent from commercial interests.

THIS PETITION CAN BE SIGNED BY THOSE SUFFERING ES/EHS, FAMILY, FRIENDS & SUPPORTERS
