

ES Directory Spring 2021

Dear all

Welcome to the Spring 2021 issue of the ES Directory. Thank you to everyone who has sent in suggestions for useful products and services. New entries this issue include:

AT LAST – SENSIBLE Wi-fi – which only switches on when a device wants to connect with it, and can be set on a timer to go off, for example at night** **Does it work?** If you try it/buy it for a neighbour or family please let us know.

Please keep them coming – either email info@esdirectory.org.uk or send to BM Box ES-UK, London WC1N 3XX, marking the envelope ES Directory. Please include postal addresses and telephone numbers for suppliers. **Do not just send web links!** We do not have the resources to follow these up.

Please note – we are interested in products and services that measurably reduce the amount of EMF exposure, or enable people to avoid places which have high EMF levels – no pendants or herbs please.

CONTENTS

- A – Suppliers of shielding products and/or surveys and detection equipment.
- B – Lighting

Danell low-EMF wall, ceiling, table and standard lamps.

Details of Danell lamps at www.danell.de

NB: If you buy table or standard lamps they come with a German plug. This will need to be replaced with a UK plug and the appliance properly earthed. If in doubt consult a qualified electrician. Alternatively you can purchase a special adapter which will earth the appliance correctly, NB Normal Continental/UK adapters WILL NOT WORK AND WILL CREATE VERY HIGH FIELDS. Try the Schuko to UK mains adapter from Maplins (see below).

Technology Alternatives Corp. 1950 NE 208 Terrace, Miami, FL. 33179

Shielded computers offgassed prior to sale, designed for people with ES/MCS including light-free displays.

Digital TV

Many people are reporting problems with digital TVs. One way round this might be to use the smallest possible digital decoder and put it in the back of an analogue TV, or if this still causes problems, in the back of a video recorder and stay in another room whilst it is on. You can then watch videos of TV programmes on an analogue TV. Not ideal, but better than nothing.

E. TELEPHONES

Digital Cordless (DECT) phones which do not emit microwaves when not in use, unlike standard DECT phones which emit microwaves constantly.

Siemens Gigaset range (some models only)

www.gigaset.com

Tel: Service Hotline 020 3695 3111 (UK)

Available in the Argos Catalogue! If put wholly in ECO mode, these DECT phones are radiation-free when not in use, and transmit less when being used.

Swissvoice

www.swissvoice.net

The Swissvoice ePure 2 DECT phone has zero microwave emissions in stand-by mode. Some people with ES have bought these low radiation phones for their neighbours as a substitute for their standard DECT phone.

Beneficial Environments

www.beneficialenvironments.co.uk

Airtube headsets for mobiles, DECT and wired handsets. Video advice on how to use them.

EMF Safety Superstore (details in section A) sell air tube headsets with microphones which can be used at the end of an extension cord (or several joined together) – plus a jack to connect them to any normal phone.

However, many people simply use hands-free phones. Some people have problems with the small LCD displays on some makes of phone. It is worth trying a hands-free phone without a display if you are very sensitive, eg. The BT Big Button 100 phone, and earthing it with wire from one of the metal screws on its base to the earth pin of a socket. The new BT Big Button 200 is really rubbish – try to source the 100.

NOTE: Whether or not you have broadband, make sure you have ADSL microfilters on all your telephone sockets, or the broadband signal comes up the phone line and can cause people to react when using the phone. Available from Maplins (see details under Lighting).

F. FOOD SHOPPING
