

# How safe is your phone?

**The recent US \$30 million study of radio frequency radiation on animals shows 'clear evidence' of cancer.**

(NTP, 2018)

**The UK Chief Medical Officers advise that 'children and young people under 16 should be encouraged to use mobile phones for essential purposes only, and to keep calls short'.**

(NHS, 2011)

**The World Health Organization classifies radio frequency radiation as a 2B possible human carcinogen (cancer agent).**

(IARC, 2011)

*Radio frequency radiation is used by mobile and cordless phones, 5G, Wi-fi and smart meters.*

*Health effects can include: reduced male fertility, anxiety, disturbed sleep and headaches, as well as cancer.*
