

Why risk your health with Wi-Fi?

Wi-Fi is an important threat to human health

EMF* Awareness Day
11 June 2018

- ✓ Switch off your Wi-Fi and spend the day without your smartphone!
- ✓ Use wired cables for internet access instead.
- ✓ Always switch off Wi-Fi and smartphones in bedrooms at night.

Know the risks.

*Electromagnetic Fields

“Repeated Wi-Fi studies show that Wi-Fi causes oxidative stress, sperm/testicular damage, neuropsychiatric effects including EEG changes, apoptosis [cell death], cellular DNA damage, endocrine changes, and calcium overload.”

Dr M Pall, Professor Emeritus, Washington State University (Environmental Research, 2018)
